Professional Summary

I am an aspiring problem solver, being a penultimate Bachelor of Commerce in Finance and Information Science student at the University of Otago. I am particularly passionate about AI, cloud, corporate finance and leveraging technology for financial efficiency. My experiences have put me in positions where I am able to leverage my transferable teamwork, problem-solving mindset, and communication skills. This was shown while working as a Lifeguard for the Council and while working at Swimart during the busy summer period. I think I am a good fit in growth-mindset environments where collaboration is appreciated.
